

Monitoring & Analytics on the Level Access Platform

Every update or change to your website can result in accessibility issues being introduced. With always-on Monitoring and Analytics on the Level Access Platform, we give you the tools to gain a complete and timely understanding of accessibility performance across your digital properties.

Key insights to improve accessibility health

Prioritize your remediation efforts with monitoring insights that drive critical accessibility improvements.

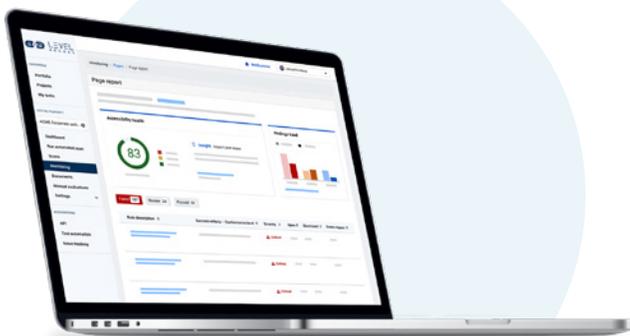

Monitor critical issue trends and visualize progress over time

Analyze how often critical issues are discovered.

Easy and convenient access to all monitored webpages

Keep a pulse on all the pages you've set up for monitoring from one convenient interface.

Maximize team efficiency

Sort, flag, and prioritize key pages to focus your teams' efforts on resolving issues that have the highest impact on user experience.

Alerts to notify you of health score drops

Set up alerts to quickly address any critical drops to your accessibility health.

Use Monitoring & Analytics with the advanced project management capabilities of the Level Access Platform to maximize your efforts and your customers' experiences.

Monitoring & Analytics

Always-on monitoring lets you track your progress and quickly address any critical accessibility issues.

Issue Prioritization

Focus resources on resolving issues with the highest impact on user experience.

Issue Tracking Integrations

Use custom integrations with issue tracking systems, including Jira and Azure DevOps, to integrate remediation into your product and development workflows.

Advanced Projects and Tasks

Streamline remediation work with native built-in project management and collaboration tools.

About Level Access

Level Access is an all-in-one digital accessibility solution designed to help organizations make their digital content accessible for individuals with disabilities and compliant with global mandates.
