

The Leading Digital Accessibility Solution

Recognized by Forrester

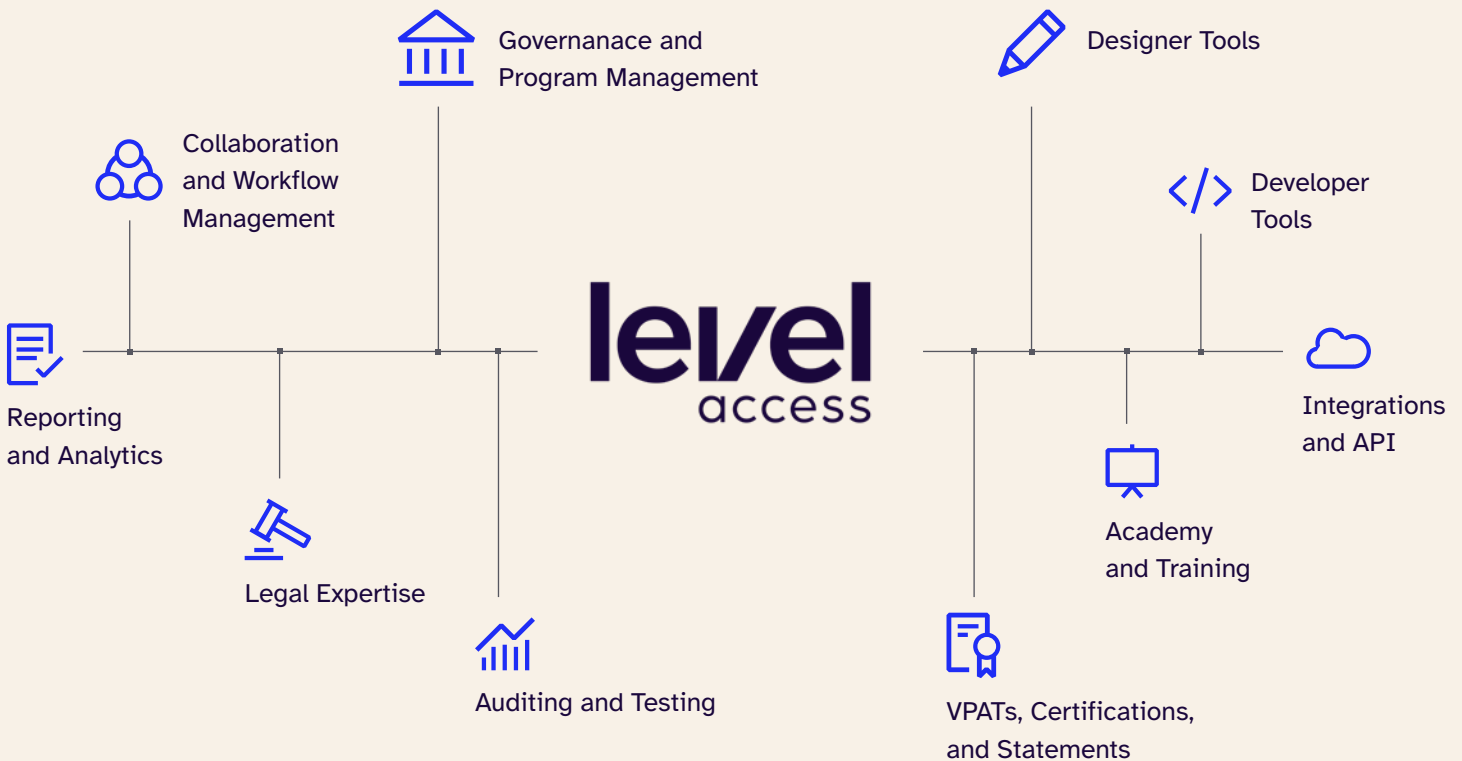

Level Access is a Leader in The Forrester Wave™: Digital Accessibility Platforms, Q4 2023 report, receiving the highest score in the current offering category.

Get streamlined, centralized, smarter digital accessibility management with Level Access.

Our unified platform is your central hub for accessibility work. It serves as your core system of record, giving your team access to advanced tools, integrations, reporting, program management, and training. It is the only platform needed to ensure everyone—from designers and developers to marketers and lawyers—can collaborate in a single system.

And our experts step in to navigate any technical or regulatory complexities with legal expertise, code-level guidance, design review, and accessibility training.

It's the market's leading platform backed by an unlimited support model, ensuring teams receive technical and strategic assistance whenever they need it.

The Level Access Platform

The Level Access Platform provides a complete overview of the progress of your digital accessibility work. With dashboards, integrations, and workflow management, your teams will have the resources, analytics, and tooling to manage your digital accessibility program clearly and confidently:

- Base your decision-making on accurate and timely data with advanced analytics, monitoring, and robust reporting capabilities.
- Track the accessibility status of your organization-wide accessibility program or focus on the issue details for a single digital property.
- Mitigate your legal risk by accessing a system of record, which maintains a complete history of the accessibility state and progress for each of your digital properties.
- Boost productivity and accelerate digital accessibility work with teams across your organization by integrating with tools they're already using, like Jira, Azure DevOps, and Asana.
- Improve efficiency by addressing accessibility issues before your digital experiences go live using our CI/CD integrations, APIs, and browser extension.
- Scale confidently regardless of the size or complexity of your digital portfolio.

Expert support services

Our solution also includes anytime access to expert managed services like technical expertise, legal support, program management strategy, and accessibility training:

- Receive guidance to fix complicated accessibility issues and ensure ongoing conformance with the Web Content Accessibility Guidelines (WCAG).
- Access legal insight and expertise from highly experienced digital accessibility lawyers to help navigate an Americans with Disabilities Act (ADA) demand letter or lawsuit and mitigate future risk.
- Request accessibility testing and auditing, including evaluation of key user flows and testing conducted by people with disabilities.
- Get a completed Voluntary Product Accessibility Template (VPAT®), along with WCAG conformance statements and accessibility statements.
- Receive support creating and implementing organization-wide accessibility policies to strengthen diversity, equity, and inclusion (DEI) and environmental, social, and governance (ESG) initiatives.
- Access our Academy for self-paced, on-demand, or customized digital accessibility training courses mapped to specific roles and responsibilities.

The essential difference

Level Access is the market's only full-scale, enterprise-ready digital accessibility solution combining the leading accessibility platform with access to expert managed services for centralized, streamlined, smarter accessibility management.
