

The Level Access Way:

Proven, Scalable Digital Accessibility

Make accessibility a way of work

To manage accessibility across teams and assets, you need more than tools. You need to embed accessibility into your everyday operations, so it becomes a powerful part of how work gets done.

The Level Access solution was built for this. Our Hybrid Intelligence model combines platform automation, AI, and expert human guidance, so you can find and fix issues without slowing down development or demanding more time from your teams. And we make it easy to show your progress with reporting that connects your effort to the outcomes that matter most to your organization.

For lasting success, your teams can access live and on-demand training to build sustainable accessibility skills, making accessibility part of your organizational culture.

FORRESTER®

**WAVE
LEADER 2025**

Digital Accessibility
Platforms

Named a Leader by Forrester

Level Access was named a Leader in The Forrester Wave™: Digital Accessibility Platforms, Q4 2025 report, with the highest possible score in the “current offering” category.

Find the risks that matter

Uncover accessibility issues across your entire digital portfolio and focus attention where it matters most. Through actionable manual audits, powerful automated scans, and testing by real users, you can identify what truly impacts your customers and compliance status.

“Level Access provided us with the expertise we needed to understand our legal obligations, and the tools and training we needed to meet them efficiently—reducing risk and improving usability for every customer.”

Daniel Upton, Chief Technology Officer,
Honeylove

Level Access received the highest scores possible from Forrester in its Manual Testing Functionality, Monitoring, Document Testing, Component Testing, and User Flow testing criteria.

FORRESTER®

Fix and prevent issues in the flow of work

Improve accessibility while staying on schedule by embedding issue remediation—and accessible design—into your existing tools and processes. With Level Access, you can ensure that questions get answered quickly, work is organized and efficient, and issues you’ve already tackled don’t resurface.

“The Level Access Platform put time back in my day. Instead of spending hours navigating between multiple systems, I can sort test results and triage issues right in the platform. Our program is much more efficient as a result.”

Lorena Brito, Front-end Engineer,
Entrepreneur Media

Entrepreneur

Prove measurable, credible progress

Demonstrate impact and drive accountability with streamlined governance and reporting tools. Easily communicate progress across assets and teams while aligning accessibility with recognized standards and business goals.

"The comprehensive tools and reporting system that Level Access offers support our distributed approach to accessibility. We can manage accessibility at both the individual team level and the organizational level, allowing us to share responsibility while operating autonomously."

Robertson Odom, Principal Software Engineer,
Horizon Design System,
CarMax

Forrester recognized Level Access with the highest score of 5.0 in both the Reporting and Program Analytics criteria.

Learn what you need to succeed

Build capability across teams with live and on-demand training through the Level Access Academy, including role-specific learning paths for designers, developers, content authors, and other key team members.

"With Level Access, we have access to ongoing training and support, so we're fully educated on the latest standards and best practices. And continued education is critical because the work is never done."

Che-Bin Liu, Director of Software Engineering,
Socure

Level Access received a perfect score of 5.0 in Forrester's Embedded Learning criteria.

Pioneering the next wave of digital accessibility

Our Hybrid Intelligence approach—combining platform automation, AI agents, and human expertise—helps accessibility programs operate at the speed and scale of today’s digital world.

Our product roadmap is shaped by our customers’ needs. We continuously expand and refine our solution to keep pace with evolving technologies, standards, and accessibility expectations, so your program is always prepared for what’s next.

“Level Access envisions a future where agentic AI gives every company an accessibility team...Backing up its vision, Level Access has a thoughtful approach to innovation along with a sizable product, design, and engineering organization. Its roadmap is published, and all reference customers validated its transparency.”
